OBJECTIVE

I'm a passionate Front-end Developer with a strong focus on creating intuitive, user-centered interfaces. I thrive on transforming complex ideas into clean, functional designs that enhance user experience and accessibility. With a collaborative mindset, I enjoy working closely with design teams, developers, and clients to bridge the gap between vision and execution.

I'm driven by continuous learning, open to challenges, and always looking for opportunities to grow both technically and creatively. Whether working independently or as part of a team, I bring a positive attitude, strong communication skills, and a good sense of humor to every project. Building lasting relationships with colleagues and clients is just as important to me as writing clean, scalable code.

My goal is to contribute to meaningful digital experiences—and to make technology feel more human.
